

Privacy Film & Manifestations

Privacy inside and out

Create Space
Be Courageous
Be Graphic
Reinvent

FEATURES

- **Provides privacy between offices/rooms**
- **Allows you to incorporate branding on glass panels**
- **Bespoke design available**
- **Enhances the look of your office**
- **Allows maximum amount of natural light to enter your building**

This is an ideal solution to maintain privacy within an internal environment, between offices/rooms or indeed to separate private areas from public.

Ideal for Conference Rooms, Lobbies, Retail Environments, Residential Settings, Private Offices, Glass Partitions, or wherever there is a need for “decorative privacy”. Privacy Film can be used on windows combined with Solar/Anti-Glare Film so that those looking in, can only see either reflective or darkened glass, while those looking out can have a (protected) view. We are very happy to work in consultation with your interior designer or architect on bespoke designs. These special commissions can vary from full colour right through to shapes in a frosted or etched glass appearance. We will execute your particular design and have it applied in your office with the minimum of disruption/inconvenience to your working environment.
